

Notice to Mariners No 13/25

ARDERSIER PORT – Marine GI works

Mariners are reminded that Ardersier Port is being redeveloped into an Energy Transition Facility and remains closed to commercial and leisure traffic until the works are completed in the latter part of 2025.

There will be drilling of sampling boreholes below MHWS as located on the drawing below for the purpose of geotechnical stability assessment and chemical analysis to inform the design of the proposed dredge extension at Ardersier Port.

The drilling shall be conducted from two floating barges, held in position by spud legs. Each barge shall be manned and tended for the duration of the work scope, starting in August for approximately 6 weeks.

There will be several small workboats associated with the works, to assist moving the barges and transferring of personnel. All marine craft shall be listening on VHF. Ch74
